

ABSTRACT

An anisotropic conductive connector device including an anisotropic conductive film provided with a plurality of conducting path forming portions extended in a direction of a thickness in a state in which they are insulated from each other through an insulating portion, and a sheet-like connector in which an insulating sheet is provided with a plurality of electrode structures extended in a direction of a thickness thereof. The sheet-like connector is provided integrally on or is integrated with the anisotropic conductive film in a state in which each of the electrode structures is positioned on each of the conducting path forming portions of the anisotropic conductive film.
